

### Meeting Notes - Activity 3 - March 14

- Liked the ability to access the cart and see what had been selected
- Liked having a description of what items are included in each hamper
- Wants to add a email/text confirmation along with the website's confirmation message
  - Added a message telling the user they will get a text confirmation to the phone linked with their account
- The into page is alright if being linked from the parent site (This was the original plan)
  - Will need a redesign if there is not a link to the parent site
- Replace the search function with a FAQ page
  - Less confusing for the user
  - Easier and quicker to have common questions about the hamper process answered
- If we decided to keep the search it should've been:
  - Helpful
  - Provides quick, easy links related to the prompt
  - Almost a bot-like function
